Samsung Galaxy S9	✓	✓

You must first register for Philips field apps to receive a username and password, then download **Philips Field Apps** from the Google Play Store.

For the latest list of all supported phones, please visit our website.

Positioning

The IR dongle must be plugged in the headphones jack of the smartphone. The figure above illustrates the importance of the installer's position for correct commissioning of SNH200 using the IR dongle.

Tips for use

- **Allow all pop-up messages** from the App
e.g. "Allow Philips Field Apps to record audio? Allow Philips Field Apps to access photos, media and files on your device?"
- **Aim the emitter of the dongle** at the target luminaire using the IR dongle and check the light behavior according to steps in the App to confirm the command gets executed. (light dimmed, light blinks twice, etc.).
- **Remove battery insulator** strip from the dongle. Leave in-place or re-insert if dongle will be unused for extended periods.
